PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1a (DIA). The photographic analysis for this particular report was performed by the NPIC Photographic Analysis Group.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training area or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

A probable ammunition storage area is located 9 kilometers (km) northwest of Voznesensk (Figure 1).

The installation covers approximately 440 acres and contains 1 administration building, 4 barracks, 5 quarters, 1 storage building, 8 large probable ammunition storage buildings, 18 small probable ammunition storage build-

ings, 2 vehicle sheds, 9 support buildings, and a probable small-arms firing range (Figures 2 and 3).

The installation was covered by [redacted] missions from [redacted]. Comparative analysis reveals no significant changes in facilities during this period. The installation appears active on all coverage.

DESCRIPTION OF INSTALLATION

Railroad Service

A spur from the Novo-Ukrainka--Voznesensk railroad is on the north side of the installation. Track activity indicates probable trackside unloading in Area A (Figure 3).

Road Service

A probable all-weather secondary road provides access to the Konstantinovka-Voznesensk highway.

Administration and Troop Housing Area

Area D contains 1 administration building, 4 barracks, 5 quarters buildings, and 3 support buildings.

General Storage Area

Area E contains 1 storage building and 2 support buildings. Numerous clearings in the wooded area suggest the possibility of additional buildings or open storage. Foliage precludes additional interpretation.

Ammunition Storage Area

Area F contains 8 large probable ammunition storage buildings, 18 small probable ammunition storage buildings, and 2 support buildings. The area appears to be in use. This area and the general storage area are surrounded by a firebreak and are doubly secured.

Equipment Storage/Maintenance Areas

Area J1 contains one 240- by 60-foot vehicle maintenance/storage building and 2 support buildings. Track activity indicates the building is in use.

Area J2 contains 1 L-shaped probable vehicle storage building measuring 150 by 40 feet and 110 by 40 feet. The area is located outside the main security fence; however, it is separately secured.

Small-Arms Firing Range

Area L is a 900- by 150-foot probable small-arms firing range. Track activity indicates usage of this area.
